

GOVERNMENT OF TELANGANA
ABSTRACT

EFS&T Department – Declaration of the Tiger Corridor Area connecting the Kawal Tiger Reserve in Telangana to Tadoba-Andhari Tiger Reserve in Maharashtra as "**Kumurambheem Conservation Reserve**" under section 36A of Wild Life (Protection) Act, 1972 - Notification – Orders – Issued.

ENVIRONMENT, FOREST, SCIENCE & TECHNOLOGY (FOR.I) DEPARTMENT.

G.O.Ms.No. 49

Dated: 30-05-2025
Read the following:-

Lr.No.PCCF-WL-3/WL25/1/2024,dt.07-10-2024, from the Prl.Chief
Conservator of Forests (P&V) & Chief Wildlife Warden, Hyderabad.

ORDER:

In the circumstances stated by Principal Chief Conservator of Forests (P&V) & Chief Wildlife Warden, Telangana in the letter read above, the Government after careful examination of the proposal hereby declares the Tiger Corridor Area connecting the Kawal Tiger Reserve in Telangana to Tadoba – Andhari Tiger Reserve in Maharashtra as Kumurambheem Conservation Reserve.

2. Accordingly, the notification appended to this Order shall be published in an extraordinary issue of the Telangana Gazette, Dated:05.06.2025 and the same shall consist the following:-

1. Notification and the details of the declaration (**Annexure -I**)
2. Compartment wise area under conservation reserve in Kumurambheem Asifabad District (**Annexure - II**)
3. Maps of the Conservation Reserve(**Annexure - III**)
4. Constitution of Conservation Reserve Management Committee (**Annexure - IV**)

3. The Commissioner, Printing, Stationery and Stores Purchase Department is requested to supply (100) copies of the printed Gazette Notification to the Principal Chief Conservator of Forests (P&V) & Chief Wildlife Warden, Telangana, Aranya Bhavan, Saifabad, Hyderabad and (25) copies to the Government.

4. The District Collector, Kumurambheem Asifabad District is requested to publish the Notification in the District Gazette and take necessary further action under section 36A of the Wild Life (Protection) Act, 1972 (Central Act No.53 of 1972).

(BY ORDER AND IN THE NAME OF THE GOVERNOR OF TELANGANA)

AHMAD NADEEM
PRINCIPAL SECRETARY TO GOVERNMENT

SECTION OFFICER

NOTIFICATION AND THE DETAILS OF THE DECLARATION

In exercise of the powers conferred by section 36A of the Wild Life (Protection) Act, 1972 (Central Act No. 53 of 1972), the Government of Telangana hereby declares the Tiger Corridor Area connecting the Kawal Tiger Reserve in Telangana to Tadob-Andhari Tiger Reserve in Maharashtra as Kumurambheem Conservation Reserve.

1. Introduction:

The proposed Conservation Reserve area is a critical part of the wildlife corridor connecting Kawal Tiger Reserve (KTR) in Telangana with Tadoba-Andhari Tiger Reserve (TATR), Kanhargao Wildlife Sanctuary, Tipeswar Wildlife Sanctuary, and Chaprala Wildlife Sanctuary in Maharashtra, as well as Indravati Tiger Reserve (ITR) in Chhattisgarh. This proposed area is part of the Central India Landscape (CIL) and spans the Kagaznagar and Asifabad Forest Divisions of Kumurambheem Asifabad District. The presence of resident, breeding Tigers in the area and several interstate Tiger dispersal events over the past decade, indicates that it is a crucial link for maintaining Tiger connectivity in this part of the CIL. Apart from Tigers, the proposed area is home to a variety of other carnivores such as Leopard, Wild Dog (Dhole), Sloth Bear, Wolf, Hyena, Honey Badger and Jungle Cat. The area also supports a diverse prey assemblage including Gaur, Sambar, Nilgai, Chital, Four-horned Antelope, Muntjac, and Indian Gazelle. The recent presence of Elephants in the proposed area signifies a notable ecological shift. This change underscores the dynamic nature of wildlife habitats and highlights the need for adaptive conservation strategies. Moreover, this area also boasts more than 240 species of Birds, including the only known nesting site of the Long-Billed Vulture, as well as the presence of Malabar pied hornbills in the Telangana State and several other rare bird species.

2. Overview: -

Conservation Reserves are specific categories of Protected Areas designed to function as buffer zones or connecting corridors between established National Parks, Wildlife Sanctuaries, and Tiger Reserves. These designations were introduced through the Wildlife (Protection) Amendment Act of 2002, an amendment to the original Wildlife Protection Act of 1972. The primary purpose of establishing such reserves is to enhance protection around existing or proposed Protected Areas, align local community interests with wildlife protection and habitat conservation to achieve sustainable environmental and socio-economic outcomes.

With this background, designating the following area as a Conservation Reserve is crucial for achieving a higher degree of protection, maintaining habitat integrity and ensuring wildlife connectivity between the existing Protected Area Network in Telangana, Maharashtra and Chhattisgarh States.

3. Area statement: -

Covering a total area of 1492.88 km², the proposed Conservation Reserve area spans across several tehsils in Kumuram Bheem Asifabad district of Telangana. It includes parts of Kerameri, Wankdi, Asifabad, Sirpur (T), Kouthala, Bejjur, Kagaznagar, Rebbana, Dahegaon and Tiryani Tehsils. This area falls under two forest divisions, Kagaznagar and Asifabad, within the Kawal Tiger Reserve Circle of Telangana state. The reserve encompasses 78 reserve forest (RF) blocks: the major reserve forest blocks are Garlapet RF, Ada RF, Manikgarh East RF, Manikgarh West RF, Dhanora RF, Gudem RF, Bejjur RF, Kadamba RF, and Giral RF.

The administration of the proposed Conservation Reserve falls under 02 Forest Divisional Officers and 01 District Forest Officer under the supervision of Field Director Project Tiger, Kawal Tiger Reserve. Further, the Administrative Maps of the proposed area are appended as **Annexure - III** and the list of Compartments and Beats falling in the Conservation Reserve is appended as **Annexure – II**.

Abstract of proposed Conservation Reserve area (Range wise):

S No	District	Division	Range	Area in Ha
1	KB Asifabad	Asifabad	Asifabad	16679.5
2	KB Asifabad	Asifabad	Kerameri	9952.93
3	KB Asifabad	Asifabad	Rebbena	14574.39
4	KB Asifabad	Asifabad	Tiryani	16357.29
		Total		57564.11
5	KB Asifabad	Kaghaznagar	Kagaznagar	17475.5
6	KB Asifabad	Kaghaznagar	Sirpur	27155.96
7	KB Asifabad	Kaghaznagar	Karjelly	15543.16
8	KB Asifabad	Kaghaznagar	Bejjur	15304.21
9	KB Asifabad	Kaghaznagar	Penchikalpet	16245.54
		Total		91724.37
		Grand total		149288.48

4. Objective: -

The proposed Conservation Reserve aims to integrate the interests of local communities with wildlife protection and habitat conservation efforts to achieve sustainable environmental and socio-economic outcomes. The primary goals include:

- **Biodiversity Conservation:** Ensuring the conservation of diverse plant and animal species within the reserve areas by leveraging the traditional knowledge and practices of local communities, maintaining ecological balance and genetic diversity.
- **Buffer Zone Creation:** Acting as buffer zones to reduce human pressure on core protected areas like national parks and wildlife sanctuaries, thereby providing additional layers of protection to critical habitats.
- **Habitat Connectivity:** Establishing corridors that connect fragmented habitats, facilitating the movement and migration of wildlife, which is essential for the genetic flow and overall health of species populations.
- **Inclusive Conservation:** Engaging local communities in conservation efforts to ensure sustainable use of natural resources, thereby promoting stewardship and reducing conflicts between people and wildlife.
- **Sustainable Development:** Encouraging sustainable development practices within and around the conservation reserves to balance ecological conservation with economic growth and livelihood needs of the local population through eco-tourism, sustainable agriculture, and other conservation-related activities.
- **Education and Awareness:** Promoting environmental education and awareness among local communities and visitors, fostering a culture of conservation and respect for nature.
- **Research and Monitoring:** Facilitating scientific research and continuous monitoring of wildlife and habitat conditions to inform better management practices and policy decisions.

These goals collectively aim to enhance the effectiveness of conservation efforts in India, ensuring that protected areas are well-integrated into the broader landscape and that both wildlife and local communities can thrive sustainably.

5. Benefits to Local Communities & Biodiversity:

Designating the proposed area as a conservation reserve will provide a wide range of social, environmental, and economic benefits to local communities and beyond. Conservation reserves play a crucial role in addressing pressing challenges such as food and water security, human health and well-being, disaster risk reduction, and climate change. However, the reliance of some local communities on forests and wildlife for their livelihoods presents a complex dynamic. To ensure both sustainable coexistence and effective conservation, it is essential to implement sustainable practices that balance these needs.

6. Hydrology: -

The proposed Conservation Reserve falls within the Godavari basin, divided into the Wardha and Pranahita sub-basins, which are further subdivided into 10 watersheds. Several tributaries, including the Peddavagu, Nagulavaivaagu, Bokkivaagu, vattivaagu, Chelamelavagu, and Wainganga rivers which flow through the corridor. Most streams are seasonal and dry up in summer, but natural springs and pools are found in some areas. Water deficiency in summer is supplemented by solar bore wells, wells, and tanks. The proposed area has perennial springs such as Mathadi in Bejjur, Samakka-SarakkaUtlu, Shivapally in Gudem Reserve Forest, and Jogapur-SarkepallyUtlu in Garlapet RF, which serve as wildlife refuges during forest fires. Water availability depends on rock formations and supporting vegetation, with major formations including alluvium, Lower Gondwana sandstones, Deccan Trap basalts, Vindhyan limestones, and Archean metamorphics. The Komaram Bheem Reservoir spans 1500 hectares across the Pedda Vagu River, the Vatti Vagu Dam covers 1100 hectares on the Vatti Vagu Stream, a tributary of the Pedda Vagu River, are the two main irrigation projects. In this context, the declaration of a conservation reserve and protecting the natural habitats would enhance water quality, promote groundwater recharge, mitigate floods, control erosion, regulate climate, support biodiversity, encourage sustainable water use, and improve resilience to climate change. These benefits collectively contribute to a more stable and sustainable hydrological cycle.

7. Natural History of the area:

The proposed area lies within the fossil-rich catchments of rivers Pranhita, Peddavagu, Wainganga, Wardha, and Godavari. Remnants of wood fossils can often be found when walking along the dried-up stream beds within these forests. The Pranahita river basin and adjoining inter trappean beds in and around the proposed Conservation Reserve are significant sites for Paleo-biology, offering insights into the ancient life that once thrived in the region. Fossil deposits found within this region, particularly in the Pranhita-Godavari valley around Asifabad and Ada, have revealed a wealth of information about prehistoric flora and fauna. In 2022, Archaeology experts discovered fossilized remains of *Physa principii*, a freshwater snail species thriving 6.5 crore years ago in Asifabad's InterTrappean beds.

8. Current status of Wildlife: -

Mammals: -

Studies on Tiger movement patterns and connectivity across the Central Indian Landscape (CIL) have shown a high likelihood of Tigers using this proposed area. The latest AITE survey in 2022 reported the presence of at least four adult Tigers and three cubs. However, strategic camera trapping, phase IV survey and year-round monitoring by the Forest Department had revealed the use of the area by more than 45 unique Tigers over the last decade. Although most of them seemed to be transient, camera trap data established that some Tigers were also resident and breeding.

Since 2015, there have been five instances where three Tigers have collectively given birth to a total of 17 cubs. Moreover, about 8 leopards were recorded in the proposed area during the All-India Leopard estimation, 2022.

Birds: -

The Pranahita region in Telangana is renowned for its vibrant bird life, boasting over 240 species within the proposed Conservation Reserve. The reserve's diverse habitats, including wetlands, riverine ecosystems and deciduous forests provide ideal conditions for a wide range of wetland, open land, and forest bird species.

Other Biodiversity-

Records from the area proposed for Conservation Reserve indicate the presence of about 23 orders of insects, 9 species of amphibians, and 34 species of reptiles.

Current records show that Indian Cobra, Russell's viper, Saw scaled viper, common trinket, bronze backed tree snake, green vine snake, common sand boa, cat snake, banded krait, red sand boa, Indian rock python, monitor lizard, Star tortoise, soft shell turtle, etc are some of the common reptiles found in the area. Muggers are occasionally seen along the Pranhita and Pedda Vaagu streams. The Indian Painted Frog is a notable amphibian species found in this area. A recent discovery in the Kagaznagar forest has recorded the presence of the Sky Blue Mushroom or Blue Pinkgill (*Entolomahochstetteri*).

9. Consultation with local communities and line departments:

The District Forest Officer, KB Asifabad has conducted consultations with local communities in 339 villages and habitations wherein the proposal to notify the area as Conservation Reserve was discussed. The local communities expressed their support for notification of Conservation Reserve. During the meetings representatives of line departments like Revenue, Panchatyat Raj, Animal Husbandry, Agriculture, Rural Development etc., participated and supported the proposal for notification of Conservation Reserve.

10. **Conservation Reserve Management Committee:** Section – 36 B (1) of Wild Life Protection Act, 1972 states that the State Govt. shall constitute a Conservation Reserve Management Committee to advise the Chief Wildlife Warden to conserve, manage and maintain the Conservation Reserve. Accordingly, a Management Committee is proposed to be constituted under Section – 36 B (2) of Wild Life Protection Act, 1972 as **Annexure – IV**.
11. **Boundaries of Conservation Reserve:** The proposed Conservation Reserve spread over an area of 1,49,288.48 Ha falls in 78 Reserve Forest Blocks of Asifabad and Kagaznagar Forest Division. In Asifabad Division the Conservation Reserve is falling in 214 Compartments covering an area of 57,564.11 Ha in 4 Ranges. In Kagaznagar Division the area falls in 269 compartments covering an area of 91,724.37 Ha in 5 Ranges. The boundary of the Conservation Reserve is co-terminus with the boundaries of the 78 Reserve Forest Blocks falling in the Conservation Reserve. The statement of compartment and Reserve Forest Block wise area is appended as **Annexure – II**
12. **Map of the Conservation Reserve:** The map of the Conservation Reserve showing the Forest Blocks and Compartments included in the Conservation Reserve is shown in **Annexure – III**. A copy of the map is available in the O/o District Forest Officer, KB Asifabad, O/o the Field Director, Kawal Tiger Reserve at Mancherla and O/o of the Chief Wildlife Warden, Telangana at Aranya Bhavan, Hyderabad.
